### Fiber Optic Cords and Pigtails

#### Fiber Optic Cords and Pigtails P/N System

This page shows all the available combinations of AT&T fiber-optic cords and pigtails.

The following steps should be followed to define the exact product needed.

**Notes:**

- All AT&T fiber-optic cords and pigtails are halogen-free, low smoke and flame retardant (LSOH).
- The default cable diameters are indicated in the following sample catalog pages. Other options available.
- The default formation of all duplex cords is ZIP (FIG-8). Other options available.
- All cords shown in the catalog are standard-loss type. Low-loss cords are available upon request.

The generic P/N of AT&T fiber-optic cords and pigtails has the following format:

28 R FF AB LLL X - CC 61

- Replace the **R** with the product type needed.
- Replace the **FF** with the relevant **Fiber Code** selected from page **B.6**.
- Replace the **A** with the relevant **Connector Code** selected from page **B.4.1** for one end of the cord.
- Replace the **B** with the relevant **Connector Code** selected from page **B.4.1** for the other end of the cord.

**Note:** In pigtails **B=0**.

- Replace the **LLL** with the required length in dm.

**Examples:**

053 = 5.3 m cord length.

185 = 18.5 m cord length.

**Note:** Default lengths are indicated in the following sample catalog pages.

- Replace the **X** with the required type

T=Standard Loss Cord

S=Low-Loss Cord

L=Super Low-Loss Cord

P=Port-Lock Standard Loss Cord - Both sides locking

N=Port-Lock Standard Loss Cord - Only one side locking

Q=Port-Lock Low-Loss Cord - Both sides locking

R=Port-Lock Low-Loss Cord - Only one side locking

A=Port-Lock Super Low-Loss Cord - Both sides locking

B=Port-Lock Super Low-Loss Cord - Only one side locking

- Replace the **CC** with the required **Cable Jacket Color** from the table below.

**Note:** Default colors are indicated in the following sample catalog pages.

Fiber Optic Cords and Pigtails

28 R FF AB LLL X - CC 61

Select the Connector Code from section B.4.1, one for each end of the cord.

Indicate the required length in dm.  
Example: LLL=053 indicates a length of 5.3 m.

T=Standard Loss Cord  
S=Low-Loss Cord  
L=Super Low-Loss Cord  
P=Port-Lock Standard Loss Cord - Both sides locking
